# Workflow Automation

Total Machine Connectivity and  
Intelligent Production Floor Management

# pulse ID Workflow Automation

- With PulseID you can **take orders from any source and for any design medium** and route them through the entire production process all the way to the machine.
- **Quick and simple barcode scanning** eliminates the need for manual USB design transfers.
- **Ensure consistency and quality output** by using predefined fabric and machine settings.
- **View production reports** for machines, operators, designs, and overall efficiency.
- **Live Production Dashboard and Live Machine Status** screens with customizable views through any device for accurate, up to the second production floor information.
- **Powerful On Demand production** with the option to add personalization.

## One Solution for All Media Types:

- Embroidery
- DTG Printing
- DTF Printing
- Wide Format
- Sublimation
- Laser Engraving
- Rotary Engraving
- ...and more!

## Improve Delivery Times and Profitability

- Reduce machine downtime and increase productivity.
- Get started quickly by barcode scanning the order and pressing start.
- Load designs and let PulseID match the machine thread layout.

## Improve Operator and Machine Performance

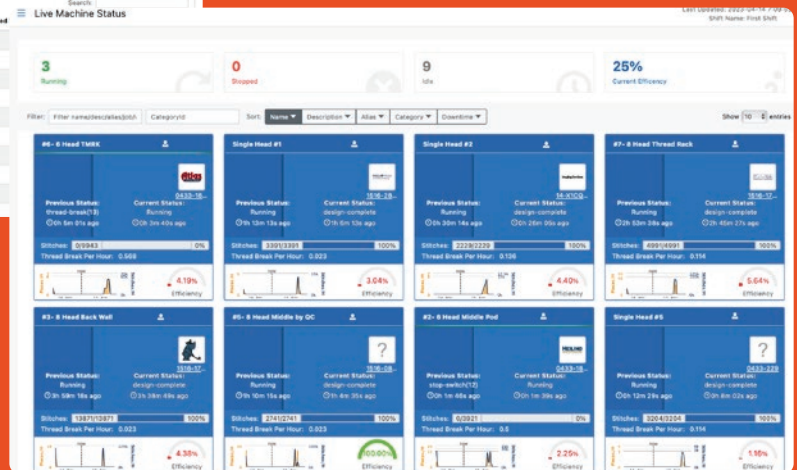

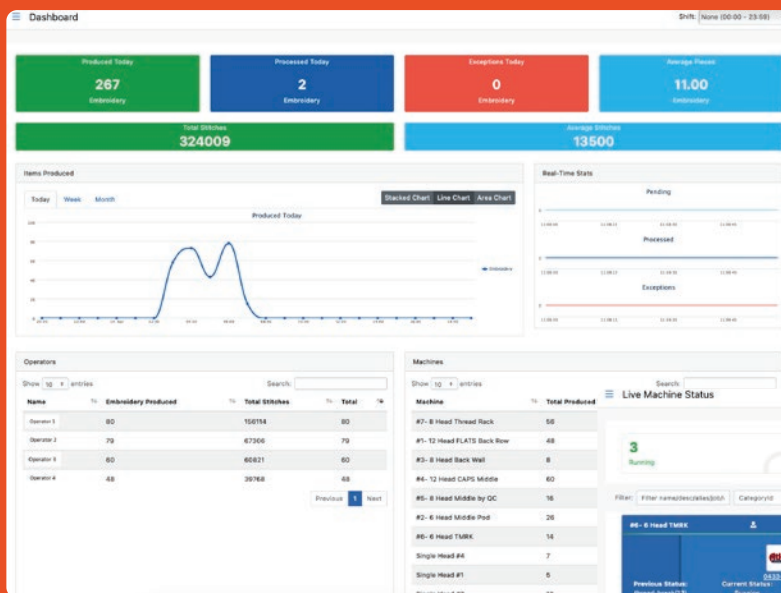

- Text and email notifications for events that affect machine downtime such as thread breaks, extended inactivity, and more.
- Detailed efficiency reports to identify any issues or inconsistencies.
- Motivate operators with performance metrics.

## Other Benefits of Workflow Automation:

- TSoft has a dedicated and responsive support team to resolve any issues.
- Seamless integration of orders from any source.
- Greatly reduce labor and training costs.
- Easily connect PulseID to the E-commerce world to expand product offerings.

## SaaS Pricing Model

- PulseID can be purchased through a Software as a Service (SaaS) pricing model, reducing upfront costs, and making it very affordable to start right away.
- The SaaS solution is hosted by Tajima Software so there's no need to deal with server costs and administration.
- PulseID is designed for scalability so that it will grow alongside your business.
